MX3 Rail & Civil Services Testimonial

Rocky Mountaineer has used MX3 Rail & Civil Services for a variety of projects throughout our sites & yards in BC. A major proponent to these projects has always been the grading and paving of our access roads and platforms for guests. Along with this we have relied on their experience to install track crossings and underground utilities. Whether it is was a larger scale project or a smaller repair, the MX3 team has always been professional and responsive to our needs, working within our schedule to ensure that our sites remained efficient throughout the projects.

MX3 is our premier contractor for our site & yard works throughout BC due to their safety, reliability and quality of workmanship.

Sincerely,

**John Campbell** | Senior Manager, Facilities & Fleet
